

## Apexlift / Bestcare Chargers

The #DPL450E-ADP chargers are universal and will fit older as well as current models of all Apexlift and Bestcare electric lifts. The charger also will work with most Medline, Lumex and Alliance brand lifts.

If you have an older gray control box you may need to purchase the small adapter cable #DPL450E-ADP-CABLE for the charger to fit properly.

You need to check the top charging port on the side of your control box to determine if you need this cable.

If you have the new port shown on the [left you do not need the cable.](#)

If you have the port shown on the [right you will need to order the adapter cable.](#)

New Port
